CASE STUDY

Lighthouse Group

Revolutionising apprentice training: How Rubitek empowered Lighthouse Group's growth and efficiency.

OVERVIEW

This case study highlights how Rubitek supported Lighthouse Group, an established training provider specialising in leadership and management training, in expanding their apprenticeship training provision and improving operational efficiency.

Lighthouse Group, experiencing rapid growth and working with larger national clients, sought a more streamlined and intuitive solution to address compliance concerns, reduce administrative burdens, and enhance learner progress tracking.

Rubitek provided a platform and mobile app, along with a bespoke ESFA funding claim module, tailored to Lighthouse Group's branding and requirements.

With Rubitek, Lighthouse Group achieved increased efficiency, learner engagement, and employer support, ultimately enhancing training outcomes.

"We knew using Rubitek would save us time and money, but we didn't realise the extent to which using multiple disparate systems was impacting operations.

Our ESFA funding claim takes seconds instead of weeks to produce and the ILR error reporting feature in Rubitek Core gives us confidence that our claims are right first time, reducing the impact of funding claw backs.

Learning journeys are very personal and we want to ensure our learners have the best and most intuitive tools to support this.

Providing a world-class learning experience is essential and with Rubitek we believe we have achieved this."

Harriet Blake
Head of Programmes
Lighthouse Group

APPROACH

Lighthouse Group had been using disparate systems and spending significant administrative time creating management information, leading to compliance concerns and duplicated solution that would support delivery, track learner progress, meet regulatory requirements, and seamlessly integrate with ESFA processes.

Rubitek developed a white-label platform and mobile app aligned with Lighthouse Group's branding, and a ESFA funding claim module was created to generate their ILR file for effortless upload.

By implementing Rubitek, Lighthouse Group alleviated administrative burdens and redirected their focus towards growth.

BENEFITS

£67,000

annual resource saving

90%

growth in apprentice numbers

Insight

real-time progress and achievement data

CONCLUSION

The collaboration between Rubitek and Lighthouse Group exemplifies the positive impact of adopting an intuitive and comprehensive training management platform.

The partnership enabled Lighthouse Group to overcome administrative challenges, improve compliance, and enhance learner journeys. Rubitek's seamless integration with ESFA processes and customizable interface empowered employers, tutors, and learners, driving engagement and achieving superior training outcomes.

By choosing Rubitek, Lighthouse Group successfully transformed their operations and positioned themselves as leaders in delivering exceptional training and apprenticeship provision.
